```csharp
using System.Drawing.Printing;
using System.Reflection;

public class MultiPrintDocument : PrintDocument
{
  private PrintDocument[] _documents;
  private int _docIndex;
  private PrintEventArgs _args;

  // constructors
  public MultiPrintDocument(PrintDocument document1, PrintDocu
  {
    _documents = new PrintDocument[] { document1, document2 };
  }

  public MultiPrintDocument(PrintDocument[] documents)
  {
    _documents = documents;
  }

  // overidden methods
  protected override void OnBeginPrint(PrintEventArgs e)
  {
    base.OnBeginPrint(e);
    if (_documents.Length == 0)
      e.Cancel = true;

    if (e.Cancel) return;

    _args = e;
    _docIndex = 0;  // reset current document index
    CallMethod(_documents[_docIndex], "OnBeginPrint", e);
  }

  protected override void OnQueryPageSettings(QueryPageSetting
  {
    e.PageSettings = _documents[_docIndex].DefaultPageSettings;
    CallMethod(_documents[_docIndex], "OnQueryPageSettings", e
    base.OnQueryPageSettings(e);
  }

  protected override void OnPrintPage(PrintPageEventArgs e)
  {
```
